(54) Title: METHOD FOR MANUFACTURING A PROSTHESIS MADE PRIOR TO IMPLANT PLACEMENT

(57) Abstract: A dental implant-to-prosthesis interface is provided, allowing 1 ateral m isalignments between the fixture heads and the connections to the prosthesis. This type of interface, in combination with a dedicated screw for fixing implant to prosthesis, allows the use of a truly pre-manufactured prosthesis for immediate loading on the implant. This system is particularly suited for cases with multiple implant placement.

Declaration under Rule 4.17:

— *of inventorship (Rule 4.17(iv)) for US only*

Published:

— *with international search report*
— *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(88) Date of publication of the international search report:

15 September 2005
